Second edition
2017-01

Solid biofuels — Determination of moisture content — Oven dry method —

Part 2: Total moisture — Simplified method

*Biocombustibles solides — Dosage de la teneur en humidité —
Méthode de séchage à l'étuve —*

Partie 2: Humidité totale — Méthode simplifiée

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The document was prepared by Technical Committee ISO/TC 238, *Solid biofuels*.

This second edition cancels and replaces the first edition (ISO 18134-2:2015), of which it constitutes a minor revision with the following changes:

- the source has been deleted in [3.2](#) and in [3.3](#);
- a few subclauses have been rephrased;
- the last sentence of [7.2](#) has been deleted;
- in [Clause 10](#), the last two items have been renumbered e) and f).

A list of all parts in the ISO 18134 series can be found on the ISO website.
