Foreword.....	v
1 Scope	1
2 Terms and definitions.....	1
3 Abbreviations	6
4 The JPEG XR image coding system.....	7
5 General overview of technical design.....	7
5.1 Basic technology structure	7
5.2 Supported image format types.....	8
5.3 Decoded image structure and interpretation.....	9
5.4 Data processing hierarchy and structures	10
5.5 The JPEG XR transform structure and hierarchy	11
5.6 Handling of image and tile boundaries	13
5.7 Quantization and lossless representation.....	13
5.7.1 Overall quantization design concepts.....	13
5.7.2 Quantization control on a spatial region basis	14
5.7.3 Quantization control on a frequency band basis.....	14
5.7.4 Quantization control on a colour plane component basis	14
5.7.5 Quantization control type combinations.....	14
5.8 Prediction of transform coefficients and coded block patterns	14
5.9 Adaptive ordering of coefficient scanning pattern.....	15
5.10 Entropy coding of transform coefficients	15
5.11 Codestream structure	16
6 JPEG XR design in relation to baseline JPEG and JPEG 2000	17
6.1 General	17
6.2 Image area partitions.....	18
6.3 Image fidelity refinement	18
7 High dynamic range (HDR) image coding.....	18
7.1 HDR formats supported in JPEG XR.....	18
7.2 HDR signal processing design in JPEG XR.....	19
7.3 Examples of HDR applications for JPEG XR.....	19
8 JPEG XR profiles and levels.....	19
8.1 Overview of profiles and levels	19
8.2 Sub-Baseline profile.....	20
8.3 Baseline profile.....	20
8.4 Main profile.....	20
8.5 Advanced profile.....	20
8.6 Levels	21
9 JPEG XR encoding practices.....	21
9.1 General encoding guidelines	21
9.2 Encoding for random access	21
9.3 Guidelines for tile size selection	22
10 The JPEG XR decoding process functionality	23
10.1 JPEG XR decoding process structure.....	23
10.2 Output colour conversion.....	24
10.3 Resolution scalability at decoder	24
10.3.1 General	24
10.3.2 DC-only image decoding	24

This is a preview of "ISO/IEC TR 29199-1:2...". [Click here to purchase the full version from the ANSI store.](#)

10.3.3	DC plus LP image decoding	24
10.4	Quality scalability at decoder	25
10.5	Spatial random access at decoder	25
11	JPEG XR codestream compressed-domain manipulation.....	25
11.1	General.....	25
11.2	Flexbits trimming	26
11.3	Flexbits and HP band elimination	26
11.4	Flexbits and HP and LP band elimination	26
11.5	Spatial versus frequency codestream mode switching	26
11.6	Rotation and flip.....	26
11.7	Compressed-domain region of interest extraction.....	26
11.8	Switching between interleaved and planar alpha planes	27
11.9	Compressed-domain retiling	27

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of the joint technical committee is to prepare International Standards. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

In exceptional circumstances, when the joint technical committee has collected data of a different kind from that which is normally published as an International Standard ("state of the art", for example), it may decide to publish a Technical Report. A Technical Report is entirely informative in nature and shall be subject to review every five years in the same manner as an International Standard.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

ISO/IEC TR 29199-1 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 29, *Coding of audio, picture, multimedia and hypermedia information*.

ISO/IEC TR 29199 consists of the following parts, under the general title *Information technology — JPEG XR image coding system*:

- *Part 1: System architecture* [Technical Report]
- *Part 2: Image coding specification*
- *Part 3: Motion JPEG XR*
- *Part 4: Conformance testing*
- *Part 5: Reference software*
